

## FASTLANE Isolation Mask Catalogue

This document is a list of isolation mask products identified by FASTLANE for sale by local vendors. “Isolation masks” are similar in fit and function to FDA-approved surgical masks, but have not been through the FDA’s premarket approval process. FASTLANE is providing this list for the purpose of helping make connections with suppliers and does not benefit from any subsequent purchases. Similarly, FASTLANE does not take any responsibility for quality or performance of purchased products. Buyers should carefully review any PPE purchase with vendors and refer to the [FDA’s recent guidance on masks](#).

Please contact FASTLANE with any questions: [FASTLANE@udri.udayton.edu](mailto:FASTLANE@udri.udayton.edu)

### Casco

<https://cascomfg.com/product/reusable-face-mask/>

“The Casco C-Matt™ Reusable Face Mask is an FDA Certified Class 1 Level 2 Mask made from white 10 mm spunbond polypropylene. As a Level 2 Mask, our product is designed for moderate to high risk fluid environments with its wide, pouch-style design that gives more room for users to breathe. Our mask is also machine washable (directions on back) for those who wish to reuse them.”
